PROFESSIONAL SUMMARY

Results-driven **Java Software Engineer** with 4+ years of experience in **software development** and **software architecture**, delivering scalable Spring Boot microservices, RESTful APIs, and CI/CD pipelines. Proven track record in end-to-end **product development**, reducing deployment times by 60%, and optimizing API latency by 35%. Possesses strong **communication skills** to collaborate across teams and a talent for **prioritizing** mission-critical tasks to meet agile business objectives in SaaS and FinTech domains.

TECHNICAL SKILLS

Languages: Java (Expert — Core Java, Advanced Java, Java 8+), Python, JavaScript, C++, Groovy

Frameworks & APIs: Spring Boot, Spring MVC, Spring Framework, Hibernate, Microservices Architecture, RESTful API Design, Web Services, Express.js

Databases: PostgreSQL, SQL, JDBC, JPA, Database Design, Query Optimization, Data Persistence

DevOps & Tools: Jenkins, Docker, Maven, Git, GitHub, CI/CD Pipelines, Linux, Postman, Automated Testing

Concepts: Object-Oriented Programming (OOP), System Design, Distributed Systems, API Development, Code Review, Agile Methodologies, Problem Solving

PROFESSIONAL EXPERIENCE

CloudFrame — Bengaluru, India

2023 – Present

Software Engineer

- Designed the **software architecture** and consumption logic for the flagship CodeNavigator product using Java, enabling real-time tracking of 10M+ metrics per month with sub-200ms processing latency.
- Reduced build failures by ~40% and cut dependency conflict resolution time by 70% by designing cf-bom, a centralized **Maven BOM** module standardizing version across 12+ Spring Boot microservices.
- Engineered a secure, modular payment gateway for the X402 protocol, driving **product development** for financial modules processing 1,000+ daily transactions with 99.9% uptime.
- Led design and delivery of Jenkins and Docker-based CI/CD pipelines for multi-module Java applications, reducing average deployment time from 45 minutes to under 18 minutes.
- Spearheaded complex **software troubleshooting** and optimized critical PostgreSQL queries with JPA-level caching, reducing average database response time by 35% and lowering infrastructure costs.

Centre for Railway Information Systems (Ministry of Railways) — Delhi, India May 2022 – June 2022

Software Engineering Intern

- Contributed to the **software development** and modernization of 5+ native Java-based railway information systems, improving system uptime by 15% through targeted **debugging software** practices and framework upgrades.
- Collaborated with a team of 8 engineers to refactor 3 legacy modules using Spring Framework, reducing average module load time by 28% and cutting reported production incidents by 30%

PROJECTS

WebToDesk — All-in-One Website to App Conversion Platform | *Java, Spring Boot, Microservices, PostgreSQL, Docker, React, Android*

- Architected a full-stack SaaS platform enabling users to convert any website URL into a packaged desktop app (Windows/macOS/Linux) and Android APK via a single interface, reducing manual native app development effort by 80% for non-technical users.
- Designed a distributed system with 6 independent microservices (user-service, build-service, packaging-service, notification-service, storage-service, API Gateway) — each containerized and independently scalable, supporting 300+ concurrent build sessions.
- Implemented an API Gateway with JWT-based authentication, rate limiting (500 req/min per user), and intelligent request routing, reducing unauthorized access attempts by 95% in load testing scenarios.

Dynamic Jenkins CI/CD Pipeline Automation | *Jenkins, Groovy, Docker, PostgreSQL*

- Developed a Groovy-scripted dynamic Jenkins pipeline automating build, test, and deploy workflows for multi-module Java apps, reducing manual DevOps effort by 65% and cutting pipeline setup time from 3 hours to 20 minutes.
- Engineered dynamic PostgreSQL port allocation and automated Docker image tagging and pushing to private registries, supporting 20+ simultaneous user environments across 500+ monthly pipeline runs with zero port conflicts.

EDUCATION

Indian Institute of Technology (IIT) Patna — Patna, India 2025 – 2027 (Expected)
Master of Business Administration (MBA) — Finance

Nitte Meenakshi Institute of Technology — Bengaluru, India 2019 – 2023
Bachelor of Engineering (B.E.) — Information Science
CGPA: 9.07 / 10

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming

ACHIEVEMENTS & RESEARCH

- Co-authored and published research paper "Predictive Pricing Model for Shared Economy Ride Applications" — Springer (ISBN: 978-3-031-43940-7_3).
- Solved 350+ algorithmic problems on LeetCode, CodeChef, and Codeforces using C++ and Java, with consistent top-20% contest rankings.
- Achieved 9.07/10 CGPA in B.E. Information Science; scored 10/10 GPA in Class X.
